PROFESSIONAL SUMMARY

Frontend Angular Developer with over 2 years of experience building scalable enterprise applications using Angular, TypeScript, and RxJS, with full-stack exposure across MEAN and MERN stacks. Experienced in dashboards, complex reactive forms, real-time API-driven systems, and Machine Data integrations within MES. Proficient in JWT, RBAC, CI/CD (Jenkins), Microservices-style architecture, and SDLC from requirement analysis to production support.

PROFESSIONAL EXPERIENCE

Angular Developer | Intelizest Consulting Private Limited | (Jan 2024 – Present)

• Developed scalable Angular modules for enterprise Manufacturing Execution System (MES) workflows and transaction processing.
• Built complex dashboards, multi-column data tables, and large reactive forms with advanced validations and dynamic controls.
• Implemented RxJS (BehaviorSubject) state management and socket-based real-time communication for live machine data streaming.
• Integrated Angular frontend with Node.js and .NET RESTful APIs, including Machine Data and weighing machine integrations.
• Led UI revamp initiatives, translating Figma designs into pixel-perfect, responsive Angular components with accessibility compliance.
• Implemented JWT authentication and RBAC; collaborated with backend teams to optimize APIs and supported CI/CD pipelines using Jenkins in Agile environments.

TECHNICAL SKILLS

Frontend: Angular, React (Hooks), TypeScript, JavaScript (ES6+), RxJS, NgRx, Redux, Angular Material, HTML5, CSS3, SCSS, Tailwind CSS

Backend: Node.js, Express.js, MongoDB, RESTful APIs, JWT Authentication, RBAC, MySQL, PostgreSQL, Python
Realtime & Integration: Socket.IO, WebSockets, Machine Data API Integration, Event-driven Architecture

Architecture & Concepts: API-driven Architecture, Component-Based Design, Microservices-style Systems, Performance Optimization, State Management

Testing & Dev Practices: Jasmine, Jest, Agile/Scrum, Code Reviews

Tools & DevOps: Git, GitHub, Postman, Jenkins, CI/CD, VS Code, Vercel, Netlify, Render, Cloudinary

PROJECTS

MERN E-Commerce Platform: Built using MongoDB, Express.js, React (Hooks), and Node.js; designed RESTful APIs for product, cart, order, and user workflows; implemented JWT authentication and RBAC; integrated Stripe payment gateway and Cloudinary; styled responsive UI using Tailwind CSS.

Realtime Whiteboard & Chat Application: Developed MERN-based real-time collaborative system using Socket.IO; designed event-driven backend with Express.js and Node.js; built REST APIs for room and session management; responsive UI using React Hooks and Tailwind CSS.

MERN Blog Platform: Developed using MongoDB, Express.js, React Hooks, and Node.js; implemented JWT authentication and RBAC; designed RESTful APIs for posts, comments, and user profiles; built MongoDB schema models; styled responsive frontend using Tailwind CSS.

EDUCATION

B.Sc. Computer Science | St. Thomas College of Arts and Science, Chennai | 2023
