## PROFESSIONAL SUMMARY

**Full-Stack MEAN / MERN Developer** with 2.5+ years of experience building scalable, high-performance enterprise and consumer web applications. Strong expertise in Angular, combined with hands-on experience in Node.js, Express, MongoDB, and React. Currently contributing to a product-based Manufacturing Execution System (MES), delivering complex data-driven UIs, real-time workflows, JWT-based authentication, RBAC, and API-driven microservice-style architectures in Agile teams.

## WORK EXPERIENCE

### **Intelizest Consulting Private Limited** – Angular Developer (Jan 2024 - Present)

- Developed scalable Angular modules for an enterprise Manufacturing Execution System (MES).
- Built complex dashboards, tables, and large-scale reactive forms with advanced validations.
- Implemented RxJS-based state management using BehaviorSubject for efficient UI data flow.
- Integrated Node.js REST APIs and collaborated on MongoDB data models.
- Implemented JWT authentication and role-based access control (RBAC).
- Optimized frontend performance for high-frequency real-time data updates.
- Worked in Agile/Scrum teams and supported CI/CD deployments using Vercel and Render.

## PROJECTS

- **MERN Fashion E-Commerce Platform** – End-to-end MERN application with product management, cart, checkout, Stripe payments, Cloudinary image handling, admin dashboard, and REST API backend.
- **Realtime Whiteboard & Chat Application** – Realtime collaborative whiteboard and room-based chat using Socket.IO, WebSockets, and event-driven backend architecture.
- **MERN Blog Platform** – Secure blog platform with authentication, CRUD operations, MongoDB schema design, and responsive UI.
