PROFILE

Angular Developer with 2+ years of experience building scalable enterprise applications using Angular, TypeScript, and RxJS, backed by strong full-stack proficiency across the MEAN and MERN stacks, including Node.js, Express.js, and MongoDB. Skilled in dashboards, complex reactive forms, and real-time, API-driven systems for Manufacturing Execution Systems (MES). Proficient in JWT authentication, RBAC, and CI/CD, with hands-on experience across the full SDLC.

EXPERIENCE

Angular Developer • Intelizest Consulting Private Limited

Jan 2024 – Present

- Developed scalable **Angular** modules for enterprise Manufacturing Execution System (MES) workflows and transaction processing.
- Built complex dashboards, multi-column data tables, and large reactive forms with advanced validation logic and dynamic controls.
- Implemented **RxJS** (BehaviorSubject) state management and socket-based real-time communication for live machine data streaming.
- Leveraged Angular Routing, Reactive Forms, Dependency Injection, and HttpClient to build scalable SPA modules and integrate **RESTful APIs** with Node.js and .NET systems.
- Led UI revamp initiatives, translating Figma designs into pixel-perfect, responsive Angular components while debugging cross-browser and cross-device UI issues.
- Implemented **JWT authentication** and role-based access control (RBAC); collaborated with backend teams to optimize APIs and supported CI/CD pipelines using Jenkins within Agile environments.

SKILLS

Frontend • Angular, React (Hooks), TypeScript, JavaScript (ES6+), RxJS, NgRx, Redux, Angular Material, HTML5, CSS3, SCSS, Tailwind CSS

Backend • Node.js, Express.js, MongoDB, RESTful APIs, JWT Authentication, RBAC, MySQL, PostgreSQL, Python

Real-Time & Integration • Socket.IO, WebSockets, Machine Data API Integration, Event-Driven Architecture

Architecture & Concepts • API-Driven Architecture, Component-Based Design, Microservices-Style Systems, Performance Optimization, State Management

Testing & Dev Practices • Jasmine, Jest, Agile/Scrum, Code Reviews

Tools & DevOps • Git, GitHub, Postman, Jenkins, CI/CD, VS Code, Vercel, Netlify, Render, Cloudinary

PROJECTS

MERN E-Commerce Platform

Built a full-featured e-commerce platform using MongoDB, Express.js, React (Hooks), and Node.js. Designed RESTful APIs for product, cart, order, and user workflows; implemented JWT authentication and RBAC; integrated the Stripe payment gateway and Cloudinary; and styled a responsive UI with Tailwind CSS.

Real-Time Whiteboard & Chat Application

Developed a MERN-based real-time collaborative application using Socket.IO. Designed an event-driven backend with Express.js and Node.js, built REST APIs for room and session management, and delivered a responsive UI using React Hooks and Tailwind CSS.

MERN Blog Platform

Developed a full-stack blogging platform using MongoDB, Express.js, React Hooks, and Node.js. Implemented JWT authentication and RBAC, designed RESTful APIs for posts, comments, and user profiles, built MongoDB schema models, and styled a responsive frontend with Tailwind CSS.

EDUCATION

B.Sc. Computer Science — St. Thomas College of Arts and Science, Chennai

2023
